of the Rules to Incorporate the )  
Forfeiture Guidelines )

CI Docket No. 95-6

DOCKET FILE COPY ORIGINAL

To: The Commission

REPLY COMMENTS OF THE  
AMERICAN MOBILE TELECOMMUNICATIONS ASSOCIATION, INC.

The American Mobile Telecommunications Association, Inc. ("AMTA" or the "Association"), pursuant to § 1.415 of the Federal Communications Commission ("FCC" or the "Commission") Rules and Regulations, 47 C.F.R. § 1.415, respectfully submits its Reply Comments in the above-referenced proceeding.<sup>1</sup> AMTA supports the goals of the Commission in this proceeding, namely the comparable treatment of similarly situated offenders and clearer guidance to the public regarding the forfeitures to be expected for particular violations.<sup>2</sup>

The record in this proceeding supports the Commission's proposal to use its *Forfeiture Policy Statement*<sup>3</sup> guidelines as general guidance, but to retain discretion to

depart from the guidelines based on the facts and circumstances in each case.<sup>4</sup> The comments generally do not, however, support the guidelines in their present form. The record provides a strong consensus against widely differing base forfeiture amounts for different classes of licensees for the same violation. Many commenters especially note the unreasonably high base forfeiture amount for common carriers, regardless of their size.

**I. The Record Supports Non-Binding Forfeiture Guidelines.**

In the *NPR*, the Commission proposes to institute guidelines for imposing forfeitures that are identical to its 1993 *Forfeiture Policy Statement*; however, the FCC notes that it proposes to adopt the guidelines as a non-binding framework. It proposes to continue to base each decision on specific facts, using the *Forfeiture Policy Statement's* adjustment factors, and possibly other factors, in arriving at a forfeiture amount. The Commission also proposes to retain its discretion not to issue forfeitures in particular circumstances.<sup>5</sup>

Many parties commenting in this proceeding agree with AMTA in supporting the Commission's proposal to adopt forfeiture standards.<sup>6</sup> Adopting a set of

guidelines will promote uniformity for similarly-situated licensees. In addition, by outlining the severity of proposed forfeitures for various types of violations, the Commission provides important guidance for licensees in preventing violations from occurring. There is no support in the record for adoption of the guidelines as a binding rule; rather, commenters implicitly or explicitly expect the FCC to adjust all base forfeiture amounts based on individual facts and circumstances.

## II. The Record Favors Modifying Proposed Categories of Licensees.

The *Notice* proposes to adopt the 1993 *Forfeiture Policy Statement*, which provides base forfeiture amounts in three categories: Broadcast/Cable; Common Carrier; and Other.<sup>7</sup> Base forfeiture amounts are set at a uniform percentage of the statutory maximum for each category, based on the Commission's perception of the severity of the violation. The guidelines also include both upward and downward adjustment criteria that may be used based on circumstances in a particular case.<sup>8</sup>

In its Comments, AMTA urged the FCC to modify the proposed categories to better reflect the realities of today's communications industry. AMTA and several other commenters noted that base forfeiture amounts for common carriers are nearly always four times as high as those for broadcast/cable licensees, and ten times as high

<sup>8</sup> *Id.* at 8-12.

as those applied to other, miscellaneous category operators for the same violation.<sup>9</sup> As service offerings merge among various classes of licensees, these widely-differing base amounts no longer make regulatory sense, nor do they reflect the Commission's goals of regulatory parity.<sup>10</sup> In addition, several commenters noted the widely-varying size of licensed entities within classes, especially common carriers; some suggested that guidelines be modified to reflect the size of the licensee.<sup>11</sup> The record thus supports modification of the proposed categories.

### **III. CMRS Licensees Should Be Subject to Forfeitures Similar to the "Other" Category**

Several commenters agree with AMTA's recommendation that commercial mobile radio service (CMRS) licensees be differentiated from other common carriers, and subject to the same base forfeiture amounts as those included in the "Other" category.<sup>12</sup> The Comments of WJG Maritel, especially, echo AMTA's concern that thousands of licensees formerly classified as private land mobile operators are now or shortly will be considered common carriers under the CMRS rules.<sup>13</sup> Most of these

operators are extremely small businesses; it is unreasonable to subject these businesses to base forfeiture amounts ten times higher than in the past for the same violation. "Simply put, the Commission should not treat all carriers as if they had the resources of AT&T or MCI."<sup>14</sup> Even with the FCC's discretion to adjust proposed forfeitures based on "ability to pay", a single forfeiture imposed could destroy many of these businesses.

Under previous forfeiture guidelines, those licensees now reclassified as CMRS were subject to private radio standards, equal to those now listed as "Other". AMTA urges the Commission to create a category for CMRS licensees with base forfeiture amounts equal to the "Other" category. This level of penalty would both better reflect the size of these entities and meet the FCC's stated goal of comparable regulation of similarly-situated carriers.

#### **IV. Conclusion**

The record in this proceeding supports the use of forfeiture guidelines as a non-binding framework to assign liability for various violations of the Communications Act and the Commission's Rules. However, many commenters note with AMTA that the classes established by the Commission do not represent the true state of the communications industry, and that common carrier base forfeiture amounts are unreasonably high given the widely-varying size of licensees now classified as common

carriers. In light of their size and regulatory history, the FCC should establish a sub-category for CMRS licensees with a base forfeiture amount equal to the "Other" category.

AMTA urges the Commission to proceed expeditiously to complete this proceeding, consistent with the recommendations detailed herein.

Respectfully submitted,
